Surveyed Lava Tubes of Jalisco, Mexico
by John Pint et al.

Profile of Cueva Cuata entrance room showing artificial wall and Santiago River in the background.

Altar in Cueva Cuata entrance room, built by religious sect.

Detail of smooth, sinuous portion of passage side wall, located at northeast edge of the Black Lagoon in Cueva Cuata. This may be part of the original lining of the lava tube. Double-A battery included for scale.

Surveying La Madriguera de los Lobos. The shape of the cave entrance can be seen in the background.
