

CENOTES DOS OJOS XEL-HA, QUINTANA ROO

Compass & Line Survey
1 July 1986 by
James Coke, Johanna deGroot

Length: 958.6 meters

Map Symbols as per NSS Cave Diving Section

- P — Penetration (one-way swimming distance) to that point from the nearest entrance
- R "Minor" restriction (area of cave too narrow for two average-sized divers with double 72's to buddy-breathe through side-by-side)
- X "Major" restriction (area of cave too narrow for one diver with double 72's to pass through without removing tanks)
- S Silty (area of cave where only careful experienced cave divers may go without totally obscuring visibility by stirring up silt)
Note: Almost any passage may be silted out by improper swim technique.
- Z Zero visibility can be expected by even careful experienced cave divers
