

Cueva Bolas de Nieve (Snowball Cave) Tamaulipas, México

2001 Survey by the United States Deep Caving Team and the Proyecto Espeleológica Purificación:
Randy Macan, Karen Olson, Peter Penczer

Cartography by Peter Penczer, 2002
Length: 54 meters; Depth: 7 meters

Note: the entrances are in a cliff face in the wall of Infiernillo Canyon. Bill Stone and Mike Frazier first reached the entrances, in 2001, with an aid climb. The cave was denegged, so anyone visiting the cave would need to repeat the climb.
